# INTRODUCTION

## ABOUT US

Amphenol ICC, a division of Amphenol, is a world leader providing interconnect solutions for the Information, Communications and Commercial electronics markets.

## D-SUB CONNECTORS

With a broad array of configurable options, D-Sub connectors are one of the most popular interconnect products in the market today. Suitable for thousands of applications across market segments like Industrial & Instrumentation, Mobile Networks, IT/DataCom, Medical and Mil-Aero, Amphenol's D-Sub family meet all your performance and quality requirements. With advanced engineering and fast prototyping, we assure the shortest lead time for both regular and customized solutions.

Signal, power, hybrid, and rugged, we have the D-Subs that exactly match your design requirements, along with a wide choice of complementing accessories.

Our continuous improvement program is focused on manufacturing through process control, reaching high quality levels with ISO 9001 Certification, and meeting advanced application needs with innovation.

## D-Sub Standard Board Mount Connectors

Amphenol's FCI D-Sub connectors are part of an industry standard for applications requiring robust and reliable connectors. These proven D-Sub connectors are one of the most popular Input/Output interconnects, addressing a wide variety of applications in Telecommunications, Data, Consumer Industrial, Military, Instrumentation and Medical. Since many years Amphenol FCI has been offering a wide range of D-Sub connectorsto meet various design requirements including those in harsh environment.

The standard density D-Sub series are widely used for numerous applications in many market segments. Amphenol FCI offers Delta-D (single shell design) and Frugal-D (two shell design) under this category. Standard density D-Sub PCB mount connectors available in straight and angled version. They come with a large number of mounting options.

### TARGET MARKETS

### FEATURES

- A Basic I/O connector comes with five shell size and housing design
- Has a D-shaped shell design
- Meets DIN 41652 and MIL-C-24308 dimensional standards
- Available in Straight, Angle, Wire Wrap terminations
- Delta-D design (1 shell + 1 housing) with stamped & formed contacts
- Various PCB and Panel mounting accessory options available
- Lead-free and RoHS compliant

### BENEFITS

- Most popular Rugged and sturdy I/O connector
- Supports the need for polarisation
- Interchangeable and intermateable with other makes
- Support different PCB mounting requirements
- Price competitive
- Wide variety of choices for secure connection
- Meets environmental, health and safety requirements

## D-Sub Slimline

### ULTRA SLIM D-SUB CONNECTORS

Amphenol FCI has expanded the D-Sub connectors with a modified ultra slim body with contact alignment in a single row. These are available both in SMT termination suitable for reflow soldering and solder tail version for standard wave soldering. These connectors also feature solderable retention pegs that absorb vibration.

- Ultra slim design saves space
- Automated assembly saves overall process costs
- Better co-planarity ensures higher quality
- Solderable retention pegs absorb vibration
- More seating area of contact surface ensures firm soldering

#### TARGET MARKETS

#### FEATURES

- Ultra slim design with single row contacts
- Larger seating area of contact surface to SMT PAD compared to other products
- Co-planarity can be controlled during assembly itself
- Solderable retention pegs
- Unique design for riveting clinch nut to shell with fool proof torque and electrical continuity
- Extra cover to hold contact firm to housing
- SMT connector comes in Tape & Reel packaging
- Mating interface follows DIN 41652 and MIL-C-24308 dimensional standards

#### BENEFITS

- Saves 66% of PCB board space
- Contact of size 0.45 x 1.4 with firm soldering support
- Ensures better product quality
- Absorb vibration
- Secured grounding
- Strong retention between housing and contact
- Support automated assembly and saves process time
- Interchangeable with standard connectors

## D-Sub Cable Connectors

Amphenol's FCI D-Sub connectors are part of an industry standard for applications requiring robust and reliable connectors. These proven D-Sub connectors are one of the most popular Input/Output interconnects, addressing a wide variety of applications in telecommunications, data, consumer, industrial, military, instrumentation and medical. Amphenol FCI offers a wide range of D-Sub connectors to meet various design requirements including those in harsh environment.

These cable connectors are designed to act as input output connectors and mate with PCB connectors or another cable connector depending on the application. It comes with solder bucket and crimp terminations. Various associated accessories including Hoods and locking devices help to prevent risks of pulling up and accidental un-mating.

### TARGET MARKETS

### FEATURES

- A Basic I/O connector comes with five shell size and housing design
- Has a D-shaped shell design
- Meets DIN 41652 and MIL-C-24308 dimensional standards
- Available in Solder Bucket, Crimp terminations
- Frugal-D design (2 shells + 2 housings) with stamped & formed contacts
- Various PCB and Panel mounting accessory options available
- Hoods available in plastic, metalized and metallic form with locking screws
- Lead-free and RoHS compliant

### BENEFITS

- Most popular Rugged and sturdy I/O connector
- Supports the need for polarisation
- Interchangeable and interchangeable with other makes
- Support all Cable mounting requirements
- Economical solution
- Wide variety of choices for secure connection
- Supports cable connection; Prevents risks of pulling up and accidental un-mating

# D-Sub High Density Connectors

The new High Density D-Sub range is part of Amphenol's FCI I/O-Connector portfolio which provides customers access to a wide range of industry standard and application specific I/O interconnect solutions. Amphenol's FCI I/O connector solutions complete your board and system designs by providing high-density and high-speed interfaces to enable interconnect technologies for networking, storage and memory and complementary products for power distribution. Our range of standardized I/O solutions enables full compliance to industry standards, such as Ethernet, SFF, Infiniband, USB, PCMCIA or HDMI. Amphenol FCI also has the capability to provide customized I/O solutions optimized to address application specific requirements.

Through Amphenol's FCI high-speed, power, assembly and mechanical packaging expertise, you gain the advantage of getting your signals out of the box at optimal cost and performance. Amphenol's FCI I/O connectors – coupled with Amphenol FCI extensive range of backplane and board-to-board connectors and cable assembly products-enable complete link solutions for your equipment designs.

Amphenol's FCI D-Sub connectors are part of an industry standard for applications requiring robust and reliable connectors. These D-Sub connectors are one of the most popular Input – Output interconnects, addressing a wide variety of applications in Telecommunications, Data, Consumer, Industrial, Military, Instrumentation and Medical markets. Since many years Amphenol FCI offers a wide range of D-Sub connectors to meet all design requirements, and to address increasing needs for high density packaging, Amphenol FCI developed the D-Sub High Density Range.

## TARGET MARKETS

## FEATURES

- High density Dsub connectors can accommodate more number of contacts in the basic shell sizes
- Selected layouts are also available in Press-fit and Pin-in-Paste versions
- Pin-in-Paste connectors comes in Tape & Reel packaging
- Various PCB and Panel mounting accessory options available
- Hoods available in plastic, metalized and metallic form with locking screws
- Lead-free and RoHS compliant

## BENEFITS

- Answer to the increasing need for higher density packaging
- Meets different termination needs
- Time saving as it can be automatically positioned on the board using pick and place processes
- Wide variety of choices for secure connection
- Supports cable connection; Prevents risks of pulling up and accidental un-mating
- Meets environmental, health and safety requirements

## D-Sub Pin-in-Paste Connectors

The D-Sub connectors are one of the most popular I/O solutions, addressing segments such as Telecommunications, Industrial, Instrumentation and Medical. Thanks to this very complete D-Sub range, Amphenol FCI is one of the most experienced suppliers. Now we are at the forefront once again in bringing you Pin-in-Paste (Through Hole Reflow) versions.

Pin-in-Paste technology (PiP) allows the use of Through Hole product in SMT manufacturing processes. The connectors are automatically or manually placed on the board, and then soldered in the same operation as the SMT components.

Thanks to the Pin-in-Paste technology, the mechanical strengths of the Through Hole Technology soldering is maintained - still an important requirement for connectors nowadays in many industrial or telecom applications.

### FEATURES

- Through hole pins, HT insulator and metal pegs design followed in PiP
- Unlike SMT, PiP requires no specific and complex design in order to achieve co-planarity
- Pin-in-Paste connectors can be automatically positioned on the board using automatic pick and place processes (vacuum nozzle or gripper) thanks to an improved true positioning
- Less control time after reflow process and less re-work time for repairing
- Same PCB layouts and hole diameters of signal hole contacts are maintained
- Pin-in-Paste connector has a more stable process than wave soldering as it does not need constant adjust once set up
- Thorugh hole technology is maintained in Pin-in-Paste

### BENEFITS

- Supports Reflow soldering
- 20% lower price compared to SMT
- Time-saving
- Time-saving
- Fast and easy switchover from a wave soldering to a reflow process
- Higher quality
- Higher robustness in Pin-in-Paste than SMT

## ► D-Sub Pin-in-Paste Connectors

# CONNECTOR DESIGN

## OVERVIEW

In order to achieve optimum soldering results, Amphenol FCI launches dedicated Pin-in-Paste connectors. These connectors are fully adapted to Pin-in-Paste processing in all aspects, including plastic material, metal peg, housing design, pin length, and packaging.

## PLASTIC MATERIAL

The Amphenol's FCI D-Sub Pin-in-Paste connectors are molded in high temperature plastic able to withstand a temperature exposure up to 260°C peak for 10 to 30 seconds in a convection infrared or vapor-phase reflow oven.

## PLASTIC MATERIAL

The Amphenol's FCI D-Sub connectors can be packaged in different ways depending on existing installed processes.

- Tray Packaging
  - Ideal for manual placing and low volume applications

## METAL PEG

To ensure electrical continuity and low insertion forces, a specific metal peg has been designed. These metal pegs significantly increase the connection robustness after soldering.

## HOUSING DESIGN

Standoffs are specifically designed around the metal pegs to avoid any paste interaction between the back housing and the PCB. Consequently, the paste can spread around the metal peg, keeping the connector in its correct and original position.

## Tape and Reel packaging

- With or without pick-up caps: fully compatible with automatic pick and place processes like grippers or vacuum nozzles, for medium and high volume applications

## PIN LENGTH

The termination length beyond the bottom of the PCB is shorter than traditional solder-to-board products. Thus, the risk of pushing out the solder paste when setting the pin into the PCB hole is very much limited. The solder paste will not stick on the pin tip or even fall off completely, but stays around the pin for free flow during soldering. Amphenol FCI uses pin lengths corresponding to the PCB thickness +0.4mm. For a 1.6mm PCB thickness, the pin length is 2.0mm.

## D-Sub Pressfit Connectors

Amphenol's FCI D-Sub connectors are part of an industry standard for applications requiring robust and reliable connectors. These proven D-Sub connectors are one of the most popular Input/Output interconnects, addressing a wide variety of applications in Telecommunications, Data, Consumer Industrial, Military, Instrumentation and Medical. Since many years Amphenol FCI has been offering a wide range of D-Sub connectorsto meet various design requirements including those in harsh environment.

Amphenol FCI offers Standard density and Mixed power connectors in press fit termination. In SMT (Surface Mount Technology) manufacturing process, this Press-fit series connectors help to save the cost of an additional wave soldering. The "eye of the needle" termination combined with a special flat rock design (easy application by pressure on insulator) make this product line very attractive.

### TARGET MARKETS

### FEATURES

- Connectors are press-fitted into the PCB
- Flat rock contact design
- Eye of the needle termination
- Same connectors are compatible with PCB thicknesses of 1.6mm and 2.4mm
- Solder less board locking
- Press-fit boardlocks

### BENEFITS

- Saves wave soldering cost
- Easy to mount
- Ensures retention in PCB
- Flexibility in application
- Solder less grounding
- Provides additional mechanical strength

## D-Sub Mixed and Full Power DW Series

Amphenol's FCI D-Sub connectors are part of an industry standard for applications requiring robust and reliable connectors. These proven D-Sub connectors are one of the most popular Input/Output interconnects, addressing a wide variety of applications in Telecommunications, Data, Consumer, Industrial, Military, Instrumentation and Medical. Since many years Amphenol FCI has been offering a wide range of D-Sub connectors to meet various design requirements including those in harsh environment.

Amphenol FCI offers full power and mixed power versions which has been specifically developed for power applications in industrial and telecom market segment. PC board connectors are delivered with preloaded power contacts (10 – 40A). Cable crimp and solder power contacts are delivered with colour code plastic clips for an easy wire gauge identification.

### TARGET MARKETS

### FEATURES

- Power connectors available in various layouts from 2V2 to 36W4
- Power connectors available in full power and in mixed layout (signal + power)
- Contacts available from 10A to 75A
- Available in Straight, Angle, Solder Bucket, Crimp terminations
- Various PCB and Panel mounting accessory options available
- Hoods available in plastic, metalized and metallic form with locking screws
- Lead-free and RoHS compliant

### BENEFITS

- Various layout options with in the standards shell size
- Can meet both standard and Power connector requirements
- Can meet medium to high power requirements
- Support both PCB & Cable mounting requirements
- Wide variety of choices for secure connection
- Supports cable connection; Prevents risks of pulling up and accidental un-mating
- Meets environmental, health and safety requirements

## µTCA – HIGH POWER I/O PCB CONNECTORS

### OVERVIEW

This power module I/O connectors for 48V applications are designed in accordance with µTCA specifications. The robust D-Sub concept based on simplified and cost effective Delta D design combines power contacts able to handle up to 24A with signal contacts. PCB connectors are proposed in traditional solder-to-board and Pin-in-Paste versions for optimized applied cost. Specific to the design of Amphenol FCI is the fact that the connector's compact footprint allows for more space on the PCB for other components.

Amphenol's FCI D-Sub connectors are part of an industry standard for applications requiring robust and reliable connectors. These proven D-Sub connectors are one of the most popular Input/Output interconnects, addressing a wide variety of applications in Telecommunications, Data, Consumer, Industrial, Military, Instrumentation and Medical. Since many years Amphenol FCI has been offering a wide range of D-Sub connectors to meet various design requirements including those in harsh environment.

These high performance connectors are designed for severe environment applications in the field of Telecommunications - data transmission, private automatic branch switching... Connectors for Aerospace, military (125°C) class and for particularly severe applications, especially high temperature (+155°C) class available. It features machined contacts and is available with solder bucket, straight spills, angled spills and wire wrap terminations.

### TARGET MARKETS

### FEATURES

- Military grade machined contact connectors
- Available in Straight, Angle, Wire Wrap, Solder Bucket, Crimp terminations
- Various PCB and Panel mounting accessory options available
- Cadmium plated shells, Green insulators & colour coded Crimp contacts
- Hoods available in plastic, metalized and metallic form with locking screws

### BENEFITS

- Suitable for high performance Aero-Mil applications
- Support both PCB & Cable mounting requirements
- Wide variety of choices for secure connection
- Comply with MIL-C-24308 standard
- Supports cable connection; Prevents risks of pulling up and accidental un-mating

### HIGH VOLTAGE CONTACTS

Male 8638.2000

Female 8638.2001

These removable contacts are suitable for the contact cavities of the DMW series and DW series.  
The coaxial contacts are in compliance with:

- NFC 93569
- KMX4 specification

### MECHANICAL PERFORMANCE

- Mating Force Per Set of Contact: 3N
- Mating Endurance: 200
- Temperature: -55°C to + 125°C

### ELECTRICAL PERFORMANCE

- Dielectric Withstanding Voltage: 2800 V.r.m.s
- Break Down Voltage: 3200 V.r.m.s
- Insulation Resistance:  $10^6$  MΩ
- Contact Resistance:  $\leq 5$  MΩ
- Max Current Rating: 5A
- Material: TEFLON

## WIDE RANGE OF ACCESSORIES FOR SECURE CONNECTION

Amphenol's FCI D-Sub connectors are part of industry standard and are one of the most popular Input/Output interconnects, addressing a wide variety of applications including telecommunications, industrial and medical.

- Prevents accidental mismatching
- Hoods available in 9 to 50 positions for different connector pin configurations
- Metal hoods available in straight and angled terminations for EMI/RFI shielding
- Dust caps available in metal and plastic versions
- Locking screws comes with UNC 4-40 and M3 thread options

### TARGET MARKETS

### FEATURES

- Hoods available in plastic, metalized and metallic form with locking screws
- Hoods available in 9 to 50 positions
- Metal hoods available in straight and angled terminations
- Hoods available with cable clamps and jackscrews
- Hoods available in different orientations and locking options
- Range includes different locking devices like screw locks and lever locks
- Screws available in both UNC 4-40 and M3 thread options
- Metal and plastic dust caps

### BENEFITS

- Supports cable connection and prevents risks of pulling up and accidental mismatching
- Suitable for different connector pin configurations including high density series
- Suitable for EMI/RFI shielding
- Assures secure connection with required strain relief
- Supports various customization need
- Ensures secure and reliable connection
- Ensures connector intermateability
- Safeguards connector from dust and dirt when kept in unmated condition

### METALIZED HOODS

#### 19• STRAIGHT EXIT METALIZED HOOD WITH SHORT SCREWS

#### TECHNICAL INFORMATION

##### • Material: UL recognised Plastic Material

##### • Plating: Nickel over Copper

##### • Operating Temperature: -40°C to +120°C

##### • Cable Entry: Top

##### • Thumbscrews: UNC 4-40 (Short)

##### • Cable O.D: 9-way Up to 7.0mm

15-way Up to 10.0mm

25-way Up to 11.0mm

37-way Up to 13.8mm

50-way Up to 14.0mm

#### FEATURES

##### • Available in sizes 9-15-25-37-50

##### • Re-openable

### 20• STRAIGHT EXIT METALIZED HOOD WITH LONG JACK SCREWS

#### TECHNICAL INFORMATION

- Material: UL 94 V-0 Plastic Material
- Plating: Nickel over Copper
- Operating Temperature: -55°C to +110°C
- Cable Entry: Top
- Jack Screws: UNC 4-40 (Standard)
- M2.5 or M3 on request
- Cable O.D: Up to 11.7mm

#### FEATURES

- Available in sizes 9–15–25–37
- Strain relief inserts ensure a secure termination
- Re-openable

# MDBR Series Rugged D-Subminiature Connectors

## RUGGED D-SUB CONNECTORS FOR HARSH ENVIRONMENT APPLICATION, GENERATION 2

Amphenol's MDBR series D-Sub Connectors serve many markets and applications across the globe including Automotive, Communications, Industrial, Medical and Military.

MDBR series is a line of Generation 2 ruggedized D-Sub connectors with die cast housings and IP67 sealing, designed for Harsh Environment applications. MDBR provides a standard D-Sub interface. Protection is provided for the ingress of water when immersed to a 1.0m depth for a period of 30 minutes and the ingress of dust less than 75 microns under 2 kPa vacuum pressure.

- IP67 environmental sealing protects against water and dust
- Die cast metal housings protect against mechanical damage
- Operating temperature range from -40°C to +105°C for extreme conditions
- RoHS compliant to meet environmental standards

### TARGET MARKETS

### FEATURES

- Internal and external seals made with flexible silicone rubber
- Die cast metal housings
- Improved thermal cycling performance
- Mates with existing standard connectors
- Similar in size compared to standard equivalents
- Machined contacts plated with 30u" gold
- Wide variety of mounting and termination options
- RoHS compliant

### BENEFITS

- Excellent sealing to IP67 and higher protection over wide temperature range
- Protects equipment from water and dust incursion
- Mechanically rugged and stable to protect against shock, vibration and impact
- Prevents distortion
- Suitable for outdoor application with wide operating temperature range
- Suitable for a wide variety of mating connectors which are readily available
- Able to replace existing standard parts with little to no changes
- Extremely durable for demanding applications
- Replace virtually any existing standard connector using standard footprints and mounting hardware
- Meets environmental, health and safety requirements

# TECHNICAL INFORMATION

## MATERIAL

- External Shell: Die Cast Zinc, Nickel Plated
- Insulator Housing: High Temperature Resistant Nylon, Glass Reinforced, UL940V-0, Black
- Contacts: Machined Phosphor Bronze or Brass Alloy Plated with 0.76um (30u") min Gold over 1.27um (50u") min Nickel
- Gaskets & O-rings: Silicone Rubber, Black or Red
- Jack Sockets: Stainless Steel
- Dust Covers: Silicone Rubber, Grey, with Nickel Plated Brass Bushing
- Threaded Inserts: Nickel Plated Steel

## ELECTRICAL PERFORMANCE

- Current Rating: Standard Density – 5A max., High Density – 3A max.
- Contact Resistance: 20mΩ max.
- Insulation Resistance: 5000mΩ min.
- Dielectric Withstanding Voltage: Standard Density-1500V DC, High Density-1200V DC

## MECHANICAL PERFORMANCE

- Water & Dust Protection Level: Code IP67 per IEC 60529
- Operating Temperature: -40°C to +105°C
- Contact Insertion Force: Standard Density – 5.0N (18ozf) max, 3.3N (12ozf) max Average Initial, High Density – 5.0N (18ozf) max, 2.6N (9.5ozf) max Average Initial
- Durability: Per EIA 364-09, 500 Mating Cycles
- Vibration: Per EIA 364-28 Condition V, Letter D, 4.5 Hrs, No Discontinuity > 1μs
- Shock: Per EIA 364-27 Test Condition A (11ms, 50g, 1/2 Sine), No Discontinuity > 1μs

## SPECIFICATION

- Amphenol Product Specification: MIL-DTL-24308

## APPROVALS AND CERTIFICATIONS

- RoHS

## ENVIRONMENTAL

- Temperature Life w/o Load: Per EIA-364-17, 105°C, 1000 Hours
- Thermal Shock: Per EIA-364-32, -55°C to +105°C, 25 Cycles
- Humidity: Per EIA-364-31, 10 Cycles, 240 Hrs, 25°C to 65°C, 90–95%RH, with -10°C Cold Shock
- Thermal Cycling: Per EIA-364-110, 500 Cycles, 15°C to 85°C
- Mixed Flowing Gas: Per EIA 364-65 Class IIA (Cl<sub>2</sub>, NO<sub>2</sub>, H<sub>2</sub>S & SO<sub>2</sub>), 14 Day Exposure
- Isopropyl Alcohol & 5% Sodium Hydroxide Solution, 24 Hrs Each
- Solderability: Per EIA-364-52, 95% Coverage after Category 2 Steam Aging
